

SAEED ASHRAF ELFIKY

Cairo, Egypt | +201023052488 | saeedelfikybusiness@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Highly motivated SOC Analyst with hands-on expertise in SIEM platforms (ELK, Wazuh, Splunk), MITRE ATT&CK threat modeling, and network security. Proven track record deploying SOAR automation workflows (n8n) that reduced incident response time by 40%. Skilled in security monitoring, incident triage, log analysis, and root-cause investigation. Seeking to strengthen enterprise security posture through proactive threat detection and scalable security engineering.

TECHNICAL SKILLS

SIEM Platforms: Elastic Stack (ELK), Wazuh, Splunk

Security Tools: Suricata, Snort (IDS/IPS), ModSecurity, Redline, YARA, Thor, VirusTotal

SOAR & Automation: n8n (Playbooks, Workflows), FortiGate API, Elasticsearch API

Network Security: FortiGate, Cisco ASA, Palo Alto, VPNs, Network Segmentation, WAF

Operating Systems: Linux (Ubuntu/Debian), Windows, Windows Server

Programming & Scripting: Python, JavaScript, PHP (security-focused), SQL, PostgreSQL

Cloud Security: AWS (Cloud Foundations & Architecture)

Frameworks: MITRE ATT&CK, OWASP CRS

WORK EXPERIENCE

SOC Admin /SOC Engineer

Jul 2026 – Present

Inovasys | Internship

- Monitoring and analyzing security events using SIEM platforms.
- Performing alert triage and incident investigation following SOC workflows.
- Learning threat detection, log analysis, and MITRE ATT&CK mapping.
- Gaining hands-on experience with real-world cybersecurity projects and business scenarios.
- Working with security technologies such as SIEM, EDR, SOAR, Windows Event Logs, and Linux systems.

SIEM / Security Engineer

Oct 2025 – Present

Freelance | Part-Time

- Engineered and maintained SIEM solutions using ELK Stack and Wazuh for centralized log management and real-time threat detection.
- Designed and integrated EDR telemetry pipelines to improve security visibility, endpoint monitoring, and incident detection **reducing incident response time by 40%**.
- Built and optimized SOAR automation workflows using n8n and VirusTotal integrations,
- Developed and tuned detection rules, correlation logic, and alerting mechanisms to minimize false positives and improve SOC efficiency.
- Configured and managed Web Application Firewalls (WAF) using ModSecurity and OWASP CRS across enterprise environments.
- Administered Cisco ASA and FortiGate security infrastructures including firewall policies, traffic monitoring, and network segmentation.
- Performed incident analysis, triage, and root-cause investigations to identify attack vectors and strengthen defensive measures.
- Supported multi-source SIEM log integration, troubleshooting, and ongoing platform optimization for enterprise security projects.

PROJECTS

Enterprise SOC Implementation | ELK SIEM & Endpoint Security

- Deployed centralized SIEM infrastructure using Elastic Stack (ELK) for enterprise-wide security monitoring.
- Integrated network firewall logs from Fortinet FortiGate and Cisco ASA to detect network-level threat vectors.
- Onboarded Windows Domain Controller security logs to monitor authentication events, Active Directory activity, and privilege escalation.
- Integrated Kaspersky EDR telemetry and deployed Elastic Defend agents across endpoints to enhance visibility.
- Developed custom detection use cases targeting brute-force attacks, privilege escalation, and suspicious outbound traffic.
- Tuned alerting thresholds to reduce false positives and conducted comprehensive log correlation and simulated incident investigations.

Automated SOC Incident Response Workflow | n8n, ELK, Wazuh, FortiGate API

- Developed a SOAR workflow to correlate security alerts, manage cases, and trigger automated incident response actions.
- Integrated Elasticsearch and case management systems to automatically detect, deduplicate, and process critical security alerts.
- Built FortiGate API scripts to retrieve host info, create address objects, and dynamically quarantine compromised devices.
- Implemented automated case creation, alert correlation, and real-time notifications to reduce manual SOC intervention.

SOC Monitoring & Detection Project | ELK & Elastic Defend

- Implemented centralized log management using Elastic Stack to aggregate distributed system events.
- Monitored authentication events, RDP activity, and suspicious process execution, and built interactive SOC dashboards for real-time threat hunting and situational awareness.
- Created and validated detection rules through attack simulations and continuous rule tuning to improve alert accuracy.

CERTIFICATIONS & TRAINING

- **Certified Ethical Hacker (CEH v12)** | EC-Council — NTI (72 Hours)
- **Defensive Security – SOC Track** | WE INNOVATE (150 Hours)
- **AWS Cloud Foundations & Solutions Architect** | AWS — NTI (120 Hours)
- **CCNA 200-301 – Routing & Switching** | SWISS (80 Hours)
- **Network Security & Threat Mitigation** | ITIDA — NTI (120 Hours)
- **Certified Cybersecurity Educator Professional (CCEP)** | Red Team Leaders

EDUCATION

B.Sc. in Electronics and Communication Engineering

2022 – 2027(Expected)

El Gazeera Institute, Cairo, Egypt

LANGUAGES

Arabic (Native) | **English** (Fluent) | **French** (Basic)
